Esaote **Ob-Gyn solutions**: make your **ultrasound exam easier**

C 2-9
Outstanding image quality with the new high-frequency convex probe.

E 3-12
High sensitivity together with optimal resolution with the new endovaginal end-fire probe.

microV
Ultimate vascular technology with surprising sensitivity for the smallest vessels and slowest flows.
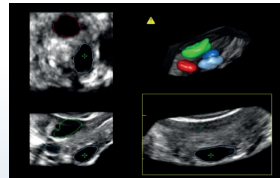

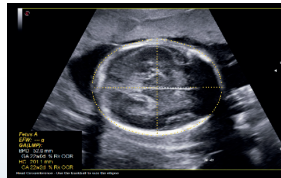

ElaXto
Real-time elastography for the assessment of tissue stiffness.

AutoOB
Automatic biometric measurements based on A.I. computing in less than 1 second.
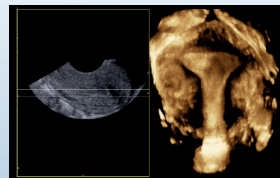

XVRA
Automatic calculation of follicle volume, with 3D rendering representation.

3D/4D in OB
Volume rendering algorithm to generate attractively realistic images of the fetus.

3D/4D in GYN
Volume rendering algorithm to obtain and visualize uterus anatomy along the different planes.
